**Conestoga College**; *Waterloo, ON*
  **Computer Programmer/Analyst** | Advanced Diploma; 3.7 GPA    **September 2019 – April 2022**

## EXPERIENCE

**Application Developer – Linamar Corporation**
*Guelph, ON | May 2021 – Aug 2021*
- Improved UI design using CSS, increasing user satisfaction by 20% based on internal feedback.
- Enhanced multilingual support, expanding accessibility for international users.
- Collaborated with the team using Azure DevOps for version control, task tracking, and deployment planning.

**Desktop Support Technician – Linamar Corporation**
*Guelph, ON | Sept 2020 – Apr 2021*
- Provided technical support to 100+ users, resolving hardware and software issues efficiently.
- Automated routine tasks with PowerShell and Bash scripts, reducing manual workload for technicians.
- Created a custom Windows 11 installation USB with pre-installed company software, streamlining device setup.

## PROJECTS

**JIMK Connect 4 - [GitHub](#) | [Live Demo](#)**
*Tech Stack: MERN (MongoDB, Express, React, Node.js), Socket.IO*
- Developed a real-time multiplayer Connect 4 game using Socket.IO for cross-device gameplay.
- Led front-end design and styling with CSS; handled debugging and integration

**Moody - [GitHub](#) | [Live Demo](#)**
*Tech Stack: PERN (PostgreSQL, Express, React, Node.js), OpenAI API, Spotify API*
- Built a mood-based playlist generator using OpenAI and Spotify APIs.
- Designed and implemented the front-end interface; deployed on Render.

**HMRDiscordBot - [GitHub](#)**
*Tech Stack: JavaScript, Discord.js*
- Created a custom Discord bot with moderation, utility, and entertainment features.
- Sole developer; implemented command handling and server-side logic.
